

Priyanka

Python Developer

Email: priyankad6513@gmail.com

Ph #: 657-337-0643

Professional Summary:

- **5 years** of experience in Analysis, Design, Development, Management and Implementation of various stand - alone, client-server enterprise applications and Hands on experience on python scripting, Django, flask and Node.js.
- Experience in working with various **Python IDE's** using **PyCharm, Spyder, PyStudio, PyScripter**, and **PyDev**. Experience in building frameworks and automating complex workflows using Python for Test Automation.
- Experienced in **AWS** services like **EC2, VPC, Route53, Lambda, IAM, Elastic Beanstalk, RDS, S3, CloudFront and Auto Scaling**.
- Experience in developing web services (**WSDL, SOAP and REST**) and consuming web services with python programming language.
- Hands-on experience in writing lightweight **Node.js** express server, using technologies such as **Ajax, JavaScript/jQuery, JSON** to make connections between server and NoSQL databases.
- Experience in implementing with server-side technologies with **restful API** and MVC design patterns with node JS and Django framework.
- Understanding server Apache Tomcat, Nginx, Web logic, WebSphere etc and Worked with bug tracking tools like BUGZILLA, and JIRA.
- Experience as a Web Application Developer and Software Engineer using **Python, Django, Flask and HTML**.
- Proficient in using editors **Eclipse, PyCharm, PyScripter, Notepad++** and **Sublime Text** while developing different applications.
- Performed integration of Code Quality Analysis Techniques like Check styles, Find Bugs and PMD with **CI tool Hudson/Jenkins**.
- Experience in **Data mining** with large datasets of Structured and Unstructured data, Data Acquisition, Data Validation, Predictive modeling, Data Visualization.
- Familiarity with development best practices such as code reviews, unit testing, system integration testing (SIT) and **user acceptance testing(UAT)**
- Proficient in developing complex SQL queries, Stored Procedures, Functions, Packages along with performing **DDL** and **DML** operations on the database.
- Experienced in NoSQL technologies like MongoDB, Cassandra and relational databases like **Oracle, SQLite, PostgreSQL, Dynamo DB** and **MySQL databases**.
- Expertise in practicing the **SDLC models, Agile** methods with **Scrum**, Extreme Programming, Ticketing systems using **JIRA** and **TDD**
- Experience in write unit test cases individually and in suits with Pytest and PyUnit on SOAP messages.
- Skilled in writing and reviewing requirements, architecture documents, test plans, design, documents, quality analysis and audits.
- Excellent analytical and problem solving skills and ability to work on own besides being a valuable and contributing team player.

Technical Skills:

Programming Languages	Python, SQL
Frameworks	Django, Flask
Web Technologies	Node.js, HTML5, JSP, XHTML, CSS3, Bootstrap, XML, JSON, JQuery, JQuery UI, Ajax, Web Services, REST API's.
Databases	MySQL, Mongoddb, Cassandra, PostgreSQL, SQLite, Oracle
Platforms	Linux, Unix, Windows.
Tools	Eclipse, NetBeans, Visual Studio, LiClipse.
SDLC	Waterfall, Agile, Scrum.
Web Servers	Web Sphere, Web Logic, Apache Tomcat.

Professional Experience:**Client:** Net32, Cary, NC**Jan 2020 – Till Date****Role:** Python Developer**Responsibilities:**

- Participated in all the stages of software development lifecycle like design, development, and implementation and testing.
- Performed efficient delivery of code based on principles of Test Driven Development (TDD) and continuous integration to keep in line with Agile Software Methodology principles.
- Built **Single Page Applications (SPA)**, **Responsive Web Design (RWD)** UI, Rich Restful Service Applications, and HTML Wireframes using HTML5 Grid Structures/Layouts, CSS3 Media Queries, Ajax, AngularJS and Bootstrap
- Developed views and templates with **Django** view controller and template Language to create a user-friendly website interface.
- Developed **GUI** using **Django** for dynamically displaying the test block documentation and other features of **Python** code using a web browser.
- Used several Python libraries like (**NumPy**, **Matplotlib**, **Beautiful Soup**, **Pickle**, **Python -gitlab**).
- Developed Restful API's using Python Flask and SQLAlchemy data models as well as ensured code.
- Worked on Jenkins for continuous integration and continuous delivery (CI/CD).
- Developed **Python/Django** based web application, **MySQL DB** and integrations with 3rd party email, messaging, Storage services.
- Used **Pandaslibrary** for statistical Analysis.
- Developed the required **XML** Schema documents and implemented the framework for parsing **XML** documents.
- Extensively used python modules such as requests, urllib, urllib 2 for web crawling.
- Used jQuery and AJAX calls for transmitting JSON data objects between front end and controllers and Utilized continuous integration and automated deployments with Jenkins, Ansible and Docker.
- Wrote and executed various **MYSQL** database queries from Python using Python-**MySQL** connector and **MySQLdb** package.
- Build SQL queries for performing various CRUD operations like create, update, read and delete.
- Used Bootstrap as a mechanism to manage and organize the html page layout. And deployed the project into Jenkins using GIT version control system.
- Responsible for tracking and monitoring project status in **JIRA (Agile)**
- Worked in development of applications especially in UNIX environment and familiar with all its commands.

Environment: Python, Django, HTML5, CSS, XML, MySQL, JavaScript, JQuery, CSS Bootstrap, Mongo DB, JavaScript, Eclipse, Git, GitHub, Jira, MySql, Linux, Shell Scripting, Agile, and Windows.

Client: Farmers and Merchant Bank, Adamsville, TN**Sep 2017 – Dec 2019****Role:** Python Developer**Responsibilities:**

- Participating in requirement gathering and analysis phase of the project in documenting the business requirements by conducting workshops/meetings with various business users. Used Agile Methodology and SCRUM Process.
- Worked on **Django** Framework that was used in developing web applications to implement the model view control architecture.
- Used **Amazon Web Services (AWS)** for improved efficiency of storage and fast access.
- Developed GUI using webapp2 for dynamically displaying the test block documentation and ther features of python code using a web browser.
- Created Data tables utilizing **PyQt** to display customer and policy information and add, delete, update customer records
- Wrote **Python OO Design** code for manufacturing quality, monitoring, logging, and debugging code optimization.
- Used PyQuery for selecting particular DOM elements when parsing HTML.
- Web-services backend development using **Python (CherryPy, Django, SQLAlchemy)**.
- Wrote Python code embedded with **JSON** and **XML** to produce HTTP GET request, parsing HTML data from websites.
- Developed a complete front-end application with **Bootstrap** and developed remote integration with third party platforms by using RESTful web services.
- Created Business Logic using Python to create Planning and Tracking functions
- Implemented **CI/CD** delivery pipeline with **Jenkins** and **AWS**.

- Maintained program libraries, users' manuals and technical documentation and managed large datasets using Panda data frames and MySQL.

- Engaged in Design, Development, Deployment, Testing and Implementation of the application.

Environment: Python, Django , Numpy, sqlalchemy, Pycharm, Java script, CSS, HTML, Bootstrap, HTTP, jQuery, JSON, AWS, Oracle SQL, JSON, REST, Shell scripting, GIT, Sublime, XML, Windows.

Client: Mud Pie, Stone Mountain, GA

Jan 2016 – Aug 2017

Role: Python Developer

Responsibilities:

- Implemented user interface guidelines and standards throughout the development and maintenance of the website using the **HTML, CSS, JavaScript** and **jQuery**.
- Engaged in Design, Development, Deployment, Testing and Implementation of the application.
- Managed code versioning with **GitHub** and deployment to staging and production servers and Implemented MVC architecture in developing the web application with the help of **Django** framework.
- Creating the automated build and deployment process for application, re-engineering setup for better user experience, and leading up to building a continuous integration system for all our products.
- Used **SOAP** and **RESTful API** for information extraction.
- Worked on implementing GUI using **PyQt** in **Python, REST & JSON** and Designed and developed a horizontally scalable APIs using Python Flask.
- Worked on python libraries like **wxPython, NumPy** and **Matplotlib**.
- Used **Pandas API** to put the data as time series and tabular format for fast timestamp data manipulation and retrieval.
- Utilized **PyUnit**, the Python Unit test framework, for all Python applications and used Django Database API's to access database objects.
- Used **PyQuery** for selecting particular **DOM** elements when parsing **HTML**.
- **Using GIT** to maintain the version of the files used in the project including branching and tagging.

Environment: Python, Django, Shell Scripting, wxpython, NumPy, Matplotlib, Pandas, HTML, CSS, JSON, Cassandra, PyUnit, PyQuery, GITHUB, Windows.
